

Basement lighting solar system installation

Overview

These are tubes that feed natural light directly into your basement. Usually placed on the exterior wall, solar tubes house a series of mirrors that help the light travel and illuminate dark spaces in your basement. As vertical light is the strongest, installing a light well is ideal if you're wondering how to bring natural light into a basement. Light wells can be full-sized or. Although light wells and solar tubes are perfect for adding natural light to your basement during the day, what about illumination during the evening?

Mix and match your lighting to illuminate the different parts of your. Another way to maximise the light in your basement is to switch to glass glazing indoors. This could be a glass partition, glass doors or even glass balustrades. Their natural reflective. Sometimes, low ceilings can contribute to making a place even darker, especially in the basement. Although actually extending your ceiling height can be pricey, there are ways of doing it without breaking the bank. For example, opting for.
