

Battery backup for home use

Overview

The DELTA 2 Portable Power Station is a medium-capacity plug-and-play power station suitable for extended power outages. Depending on your needs, you can expand the power output and storage capacity from its initial 1 kWh rating to 2 kWh or 3 kWh. The higher capacity ratings allow you to power most. The EcoFlow Delta Pro Portable Power Station is a higher capacity option than the DELTA 2, starting at 3.6 kWh and expandable to 25 kWh. The DELTA Pro can provide enough power for the average home to run essential appliances during a one-day blackout. For more. All things being equal, more power is better during a blackout. Except for the DELTA 2, all the options above begin with DELTA Pro portable power stations. It's no wonder: these high-capacity units deliver and store enough power. The EcoFlow Smart Home Ecosystem also uses DELTA Pro portable power stations and a Smart Home Panel that integrates directly with your home.
