

Home solar energy suppliers

Overview

Installing solar panels on our home can help us save money on our bills as well as increasing the amount of renewable energy going into the National Grid (and earning us money for selling that excess energy). Solar panels have been subject to two Government schemes to pay householders for energy: 1. The feed-in. The feed-in tariff was introduced in April 2010 as a way of encouraging households to install renewable and low-carbon energy generators on their homes. It included solar panels and. The Smart Export Guarantee (SEG) was introduced in 2020as a replacement for the FIT. It covers the following types of installation up to a. The scrapping of the feed-in tariff system and the move towards Smart Export Guarantee tariffs managed by energy companies has led to a significant decrease in the level of returns customers can expect to see on their. The latest figures from the Energy Saving Trustsuggest the average domestic solar PV installation costs around £6,500. Several elements affect.
