

Private companies sell solar power to the state

Overview

Although many people with solar systems on their homes or businesses think that they can sell excess electricity to the power grid, the reality is that you can only sell power to the grid if you have an electricity generator's license and qualified power-generating assets. Unless you are planning to raise tens of millions of. As we stated previously, you cannot sell power to the grid without being a registered generator. You can, however, receive billing credits for excess power from a solar system or. Electricity generators earn profits by producing power at wholesale prices and selling them to the grid for a markup. Consumers, on the other hand, can also benefit financially from sending electricity back to the grid from solar. In summary, selling energy back to the grid can be complicated and expensive. However, there are other options available to commercial and residential consumers that are looking to reduce. The amount of money you can earn from selling electricity depends on your place in the market. Registered electricity generation plants earn wholesale electricity prices for their.
